General Marking Guidance

- All candidates must receive the same treatment. Examiners must mark the first candidate in exactly the same way as they mark the last.
- Mark schemes should be applied positively. Candidates must be rewarded for what they have shown they can do rather than penalised for omissions.
- Examiners should mark according to the mark scheme not according to their perception of where the grade boundaries may lie.
- There is no ceiling on achievement. All marks on the mark scheme should be used appropriately.
- All the marks on the mark scheme are designed to be awarded. Examiners should always award full marks if deserved, i.e. if the answer matches the mark scheme. Examiners should also be prepared to award zero marks if the candidate's response is not worthy of credit according to the mark scheme.
- Where some judgement is required, mark schemes will provide the principles by which marks will be awarded and exemplification may be limited.
- When examiners are in doubt regarding the application of the mark scheme to a candidate's response, the team leader must be consulted.
- Crossed out work should be marked UNLESS the candidate has replaced it with an alternative response.

Task	Answer	Marks
A1	Graphics	
a	Logo created using the given design:  1. Vector shape with three peaks 2. Peaks shape filled with blue 3. Irregular inner shape(s) filled with white 4. Orange circle border shape (any width) 5. Box added at the bottom of the image with a blue border 6. Correct company name – sans serif font – ignore case – clearly visible (check other documents if logo has black background) 7. Fitness for purpose – three peaks clifftop shape, white inner shape, position of circle/ring (with or without border) – matches the given image (ignore colours)	7
b	Give one reason why you group shapes together when creating graphics. The elements of the image can be moved together To make it easier to align all the shapes at the same time Resizing/flipping/rotating can be done at the same time	1
